

BagPak 1000-DT (Duffel Top Bulk Bag Filler)

The BagPak 1000 filling rack is designed for easy filling of full open and duffel top bags with lift loops. The bag loops are slid onto the holder arms for filling and the full bag is removed by a pallet that sits on the base (wide base for pallet jack access available). The frame is adjustable for bags from 32" to 70" tall (other size ranges available). Easily transported via fork pocket base. Construction is heavy gage structural steel coated with epoxy paint.

OPTIONS

- Wide base construction (allows bag to be removed via pallet jack)
- All stainless steel construction
