

BBU-500-HF (Bulk Bag Unloader Half Frame)

For applications where bag suspension and/or loading is not required, the BBU-500 Half Frame bulk bag unloader offers guaranteed product discharging at a fraction the cost of similar systems. Whether using an in-house hoist or forklift, the "live bottom" style gyrated bed design will deliver consistent, reliable, and easy unloading of SuperSacks™ up to 4000lbs. Available options such as Iris Valves (for product metering or partial bag removal) and Access Doors (to reduce dusting and improve operator safety) make these machines reliable and simple to operate.

OPTIONS

- Outlet Feeder or Conveyor (Flex Screw, Pneumatic, etc.)
- Fork Pockets on Base
- Piercing Device
- Iris Valve
- Access Door
- Casters & Jacks
