

BagFlo 500-FL (Bulk Bag Unloader Fork Truck Loaded)

Constructed of HEAVY-DUTY structural steel tubing, the BagFlo-500-FL bulk bag unloader offers guaranteed product discharging at a fraction the cost of similar systems. Utilizing a "live bottom" style gyrated bed design, the BagFlo-500 can deliver consistent, reliable, and easy unloading of SuperSacks™ up to 4000lbs. The unique adjustable bag receiver arms allow easy entry and quick size change different bag heights without tools. Available options such as Iris Valves (for product metering or partial bag removal) and Access Doors (to reduce dusting and improve operator safety) make these machines complete, simple to operate, and low maintenance.

OPTIONS

- Outlet Feeder or Conveyor (Flex Screw, Pneumatic, etc.)
