BagFlo500-HT (Bulk Bag Unloader Hoist & Trolley Loaded)

Constructed of HEAVY-DUTY structural steel tubing, the BagFlo500- HT bulk bag unloader offers guaranteed product discharging at a fraction the cost of similar systems. Utilizing a "live bottom" style gyrated bed design, the BagFlo 500 can deliver consistent, reliable, and easy unloading of SuperSacks™ up to 4000lbs. With the integration of a hoist and trolley mounted in-feed system and integral crane adapter, no forklift is required and any bag size can be easily accommodated without the need for any adjustments. Available options such as Iris Valves (for product metering or partial bag removal) and Access Doors (to reduce dusting) make these machines complete, simple to operate, and low maintenance.

OPTIONS
- Iris Valve
- Access Door
- Outlet Feeder or Conveyor (Flex Screw, Pneumatic, etc.)
- Piercing Device
