

## BagPak 200-SB (Small Bag filler)

The FormPak BagPak 200 –SB small bag filler is a simple, and reliable, and accurate filler for dry materials. It can be designed for various sized and types of bags (multi-wall paper, poly, woven, etc.) as well as feed and bag per minute rates. The basic system consists of a bag sealing head with inflatable bladder seal, regulator/gauge, hand valve, load cell, scale controller, and some type of feeding device (screw, vibratory, belt, etc.). This provides a Gain-In-Weight filling process which is very accurate and easy to maintain.

### OPTIONS

- Various feeding devices (screw feeder, vibratory feeder, belt feeder, etc.)
- All stainless steel construction
- Food grade design
- Up and downstream equipment (conveyors, bulk bag unloading frames, sealers, bag kickers, metal detectors, palletizers, etc.)
